PURPOSE

Personal appearance is important to our interactions with patients, visitors, and each other. Consistent with our desire to develop the ideal patient experience, we adhere to an image that takes into account the environment and the personal appearance standards/expectations for all who work in the St Joseph Health Northern California region. Our dress code standards establish confidence and respect for the institution, while maintaining the health and safety of patients, visitors and employees at the Northern California regional ministries.

The following are primary factors taken into consideration in defining the dress code policy. These factors were created from the existing policies already approved in our Northern region ministries:

- Patient safety
- Infection control
- Personal Hygiene
- Patient Comfort
- Job responsibilities
- Cultural needs
- Employee safety
- Fragrance Control
- Resource Stewardship
- Public safety
- Professional image

The following general guidelines apply to all personnel. Guidelines for dress, within the limits of this policy, may be prescribed by individual unit/department policy. Employees are requested to ask their supervisor for specific dress standards that pertain to their individual work unit. Attire and grooming requirements that are required include:
